The Challenge

The annual planning process is often painful for pharmaceutical companies. Without a line of sight into the productivity of resources, many pharmaceutical executives are forced to contend with "across-the-board" cuts, which can undermine highly efficient resources and protect the least productive. The planning process often degrades as departments seek to protect or expand their "turf." And, the entire process itself requires substantial resources to complete. There is a better way.

Our Solution

TGaS Insights' **Resource Assessment and Planning Diagnostic (RAPiD)** provides objective data for your annual planning process.

- Eliminate ongoing budget debates with FACT-BASED, objective assessments of your company's headcount and spend by function
- Avoid across-the-board cuts due to lack of insight or objectivity
- Reduce the time and resources needed to finalize your budget
- Increase the likelihood that your budget will adequately support company goals

RAPiD will help you ensure that the right resources are in the right place at the right time.

Members receive a comprehensive assessment outlining headcount and spending by function compared to peer benchmarks.

Your Benefits

- Invest in the right things, at the right time
- Base investment decisions on verified facts
- Understand how other pharmaceutical companies have overcome similar challenges
- Target resources to areas of greatest need
- Improve outsourcing decisions
- Circumvent budget "gaming" or historical inertia
- Get data delivered in time to set and defend your budget
